# MOHAMED ABD ELGHANY

## FRONT-END & MOBILE DEVELOPER

## PROFILE

Passionate and detail-oriented front-end and mobile developer with over 4 years of experience in designing, developing, and maintaining user-friendly web and mobile applications, with a strong understanding of responsive design and performance optimization. Seeking to leverage my skills to contribute to innovative projects and deliver exceptional user experiences.

## CAREER EXPERIENCE

### GRADUATION PROJECT

2023 - MAY/2024

Mobile Developer

- The graduation project was about implementing a smart safety system to help supervisors, managers, workers and other stakeholders to enhance their safety and the work performance.
- My task was :
- developing an Android application to handle the data from worker's helmet and the maintenance process for the system.
- Using the stream functions to ensure that data will be changed in real-time, so the system can reduce the response time for accidents.
- Configure the mobile app with firebase.

### CURD application

OCT2023 - DEC 2023

Mobile Developer

- developed (CRUD) app to handle a mobile store data with the Add, Delete, Update, Restore functions.

### FREELANCER

2023 - PRESENT

Mobile Developer

- In this duration, I built a high performance flutter apps for android.
- I used firebase as database to store the values, images and other data.
- Developed mobile applications tailored to client requirements utilising native technologies.
- Optimised interfaces between hardware and software to enhance usability.
- Designed and developed software systems using initial brief.
- developed many applications like: music app, to\_do\_list with authentication feature,.

### CURD Website

FEB 2020 - MARCH 2020

Front-end Developer

- developed (CRUD) app to handle a store data with the Add, Delete, Update, Restore functions.
- handle the store employees and their salaries, and user manage profits and loses of his store.
