WORK EXPERIENCE

graduation project

2023 - MAY/2024

Android Developer

- The graduation project was about implementing a smart safety system to help supervisors, managers, workers and other stakeholders to enhance their safety and the work performance.
- My task was :
- developing an Android application to handle the data from worker's helmet and the maintenance process for the system.
- Using the stream functions to ensure that data will be changed in real-time, so the system can reduce the response time for accidents.
- Configure the mobile app with firebase.
-

CURDS application

OCT2023 - DEC 2023

Android Developer

- developed (curds) app to handle a mobile store data with the Add, Delete, Update, Restore functions.

freelancer

2023 - PRESENT

Android Developer

- In this duration, i built a high performance flutter apps for android.
- I used firebase as database to store the values, images and other data.
- Developed mobile applications tailored to client requirements utilising native technologies.
- Optimised interfaces between hardware and software to enhance usability.
- Designed and developed software systems using initial brief.
- developed many applications like: music app, to_do_list with authentication feature,.
